

Guinea Pig Risk Assessment

Date: Spring 2021

Review Date: Spring 2023

This risk assessment is to be used in conjunction with the Pets Policy

What are the hazards?	Who might be harmed and how?	What are we doing to manage the risk?	Review
Scratches, bites, nips etc	Guinea Pigs: being dropped Children & adults: being bitten, skin broken, bleeding	Children taught how to safely hold and look after Guinea Pigs to limit animals becoming stressed. Adults will ensure that Guinea pigs are calm before being picked up. If guinea pigs are being carried from one location to another over a distance they should be transferred into a small box to ensure their safety. Scratches, nips and biting cannot be avoided altogether. Appropriate first aid precautions and training in place. Children only allowed to handle any animal under staff supervision. Children warned not to put fingers through bars. Guinea Pigs were selected for their calm temperament and been in school and handled from a young age.	

Guinea Pig Risk Assessment

		<p>the other guinea pig, alert, squeaks, whistles, wheeks, popcorning and purring. If any of the following are noticed a vet will be consulted:</p> <ul style="list-style-type: none"> • Any sudden change in behaviour or habits (vocalizing more or less, scratching, licking, etc.) • Any change in eating or drinking (ingesting either more or less, refusing favourite foods, etc.) • Any change in appearance (loss of fur, swollen areas, squinty eyes, flaky skin, etc.) • Any unusual discharge from the body (runny nose or eyes, odd urine, bleeding, etc.) • Any change in movement (limping, unwillingness to move, etc.) • Any change in urination or faeces <p>The Guinea Pigs will stay in school overnight and weekends. During school holidays, a member of staff will take them home. A secure and clean cage will ensure that they cannot escape, are not harmed and are healthy. The Guinea Pigs will be kept indoors during winter months. Cage will include enrichments such as places to hide, climb over and places to gnaw to keep teeth from over growing. Guinea pigs will be kept in the quadrant outside when warm enough. This is a protected area that cannot be accessed without being in the school building.</p>	
	<p>Handling including allergies</p>	<p>Children’s parents or carers sign a consent form for the school pets during induction. This will allow parents to indicate whether they give consent for their child to be in contact with the guinea pigs.</p>
